## HOW TO PREVIEW THE APPS ON YOUR DEVICE

### There are 2 Different Ways

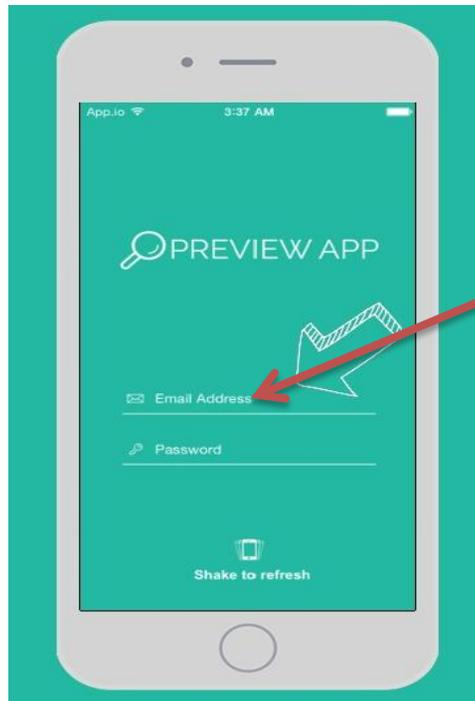

#### Option #1

**Download each desired app** to your device by searching your favorite app store with the below AppCodes. Enjoy!

Preview Your App (iOS)

Preview Your App (Android)

#### Option #2

**Download the Previewer** if you don't want to download all of the apps onto your device, you can download a Previewer app and simply enter the AppCode for any App you would like to see by following these easy steps.

1. Scan the QR code to the left or go to your favorite iOS or Android App Store and Download the app called "Preview Your App"
2. On the following pages, each App has an "APPCODE."
3. Simply input the desired AppCode into the "Email Address" field, leaving the password field blank.

Note: Full functionality may not be engaged for some features.

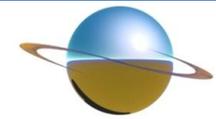

#### HERE ARE THE DIRECT DOWNLOAD LINKS FOR THE PREVIEWER IN STEP #1 ABOVE

##### Android:

<https://play.google.com/store/apps/details?id=com.previewapp11.layout>

##### iOS: (iPhone/iPad)

- ❖ Constituents access and read the latest newsletters right through the app.
- ❖ Quick links to other City Departments and local municipalities are resourceful and handy.
- ❖ The app cam allows patrons to take pictures with the options of keeping them in the app but privately on their device or easily submitting them to the Mayor's office or gallery.

## MOBILE APPS vs. MOBILE WEBSITES

Simply stated, websites are mainly for lead generation and acquisition while Mobile Apps are for audience interaction, branded experience and client retention

**There are many additional advantages but here are just some of the reasons why your business or organization needs a mobile app!**

- Push Notes are a great way to send up-to-the-minute messages, specials and valuable information to your app users. When you send a Push Note, the message goes directly to their phone or mobile device. It doesn't get lost in social media feed or remain unread in their email boxes.
- Loyalty features keep your users engaged directly with and your business to create a branded and unique customer experience.
- Brand awareness is one of the best reasons for having your own mobile app on everybody's phone! It's similar to a Billboard. The icon keeps your business in front of the users whenever they use their mobile device.
- Your app can be downloaded and used without being connected to WiFi or Internet.
- Interactive forms such as contests, surveys, or questionnaires can be integrated to gather feedback or keep your users connected and engage directly with you and your business.
- Apps are native to smartphones, giving users the option to engage features such as GPS, camera, microphone, dialer, etc. within your app.
- You are able to engage with your BEST customers at anytime and anywhere.
- "Set it and forget it" Push Notifications allow you to input your messages in advance to be sent on a future day and time, and can automatically post to Facebook and Twitter at the same time.
- The mailing list tab allows users to sign up for newsletters and other information, and can be integrated with your online accounts such as ConstantContact.com, MailChimp, iContact, Emma, and other services.
- Having your products and services available through your mobile app means that people can connect with you or buy from you whenever and wherever at their convenience.
- Data from independent analytics firms including comScore and Flurry reveal that mobile device users now spend more than 85% of their time using apps instead of mobile websites or online Internet.
